RESPONSE:

A. Retained Experts

1. Laurel Smith Stvan, Ph.D.
The University of Texas at Arlington
Dept. of Linguistics and TESOL
Box 19559, Hammond Hall 132
Arlington, TX 76019
Tel: (817) 272-9489
E-mail: stvan@uta.edu

Dr. Stvan will rely upon her knowledge of linguistics and the teaching of composition particularly with reference to the recognition and avoidance of ambiguity in written documents to testify regarding the conclusions made by an ordinary reasonable speaker of contemporary American English when examining the language of Game 5 of the Fun 5's scratch-off ticket.

The general substance of Dr. Stvan's opinions are as follows:

1. One key way the word "that" functions in the English language is to point back to the same noun in the previous sentence. So in game 5, the word "that" in the second sentence refers back to the PRIZE described in the first sentence.
2. There is a pragmatic mechanism in game 5 that relates to the sequencing of the 2 sentences. The reader expects the order of the tasks to be presented in the order in which they occur. So the action mentioned in the first sentence is performed before the action mentioned in the second sentence. In other words, once you do this first action, then this other action will follow.
3. It is clear that the 2 sentences should be read together and neither sentence should be interpreted in isolation.

As to the opinions attributed to Dr. Butters in "Plaintiffs' Expert Designations", I disagree with the opinions and statements set forth in paragraphs paragraph 3, a, b and c.

The methodology used by Dr. Stvan to arrive at her opinions is as follows:

- d. My opinions are based upon the application of general principles of the science of linguistics, particularly the branches of linguistics called syntax, discourse analysis, pragmatics and semantics. In addition, I have drawn upon my experience as scholar, teacher, and administrator in university linguistics programs dedicated to the teaching and production of clear and coherent interpretation and writing.

Dr. Stvan might possibly develop additional mental impressions and opinions as additional discovery materials become available for her review. Dr. Stvan will be made available for deposition, if Plaintiffs and/or Intervenors wish to explore the additional mental impressions and opinions. Dr. Stvan specifically reserves the right to offer additional opinions based on any new designations or opinions offered by experts designated by Plaintiffs or Intervenors.

4) Dr. Stvan has been provided with and has reviewed the following documents in addition to Plaintiffs’ Second Amended and Plaintiffs’ Expert Designation:
